**Event Sponsor:** Ervin Cohen Jessup LLP

## **PROFESSIONALS**

Kelly O. Scott

## **PRACTICE AREAS**

Employment

Companies are constantly under attack from cyber threats. Ransomware attacks, phishing emails and lost mobile devices cause problems for thousands of organizations across dozens of countries. The scams have become more sophisticated, and increasingly, Human Resources have become a target.

It's critical for Human Resources to be actively involved in data security, whether implementing and enforcing data security policies, choosing the right cloud vendors, or driving employee awareness. Technology may help us work more efficiently, but it also leads to vulnerability that increases as employees work from home and use cloud-based systems, and as mobile devices become ubiquitous.

What is the role of the Human Resources Manager/department in securing HR data specifically, preventing and responding to data breaches, and training the entire workforce about data security best practices? And what are the consequences — for the company, the employees and the HR department — when employees put the company's data at risk with the click of a mouse?

## **Seminar: Human Resources and Data Security in Today's Mobile Workforce**
